QUANTITATIVE TECHNIQUES

3 hours

INSTRUCTIONS TO CANDIDATES

Write your name and index number in the spaces provided above.

Sign and write the date of the examination in the spaces provided above.

This paper consists of TWO Sections; A and B.

Answer ALL the questions in Section A and any FOUR questions in Section B in the spaces provided in this question paper.

Show all your working.

Do NOT remove any pages from this booklet.

Candidates should answer the questions in English.

For Examiner's Use Only

Section	Section Question		Candidate's Score
A	1 - 10	32	•
		17	
B		17	
В		17	
		17	
	Total Score	100	

This paper consists of 20 printed pages.

Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing.

SECTION A: (32 marks)

Answer ALL the questions in this Section in the spaces provided after each question.

State four areas in business where quantitative techniques may be applied.	(4 marks
Solve for x in the following expression.	(3 marks
$\frac{2x-1}{5} + \frac{x}{10} = 20$	
Outline three factors that should be considered before using secondary data.	(3 marks)
tate three factors that determine the accuracy of a sample.	(3 marks)

8. Given the following sets: $A = \{3,4,0,6,9\}$ $B = \{1,2,3,4\}$ $C = \{6,3,2,11\}$ Determine $(A \cup B) \cap C$. (3 marks)

9. State two methods that may be used to measure the trend in a time series. (2 marks)

10. The data below represents the prices of a commodity from the year 2000 to 2003.

Year	Price (Ksh)
2000	500
2001	520
2002	480
2003	580

Using year 2000 as the base year, calculate the fixed base index number for each year.

(4 marks)

SECTION B: (68 marks)

Answer any FOUR questions from this Section in the spaces provided.

- 11. (a) Outline four advantages of Geometric Mean as a measure of central tendency. (8 marks)
 - (b) Using matrix approach, solve the following simultaneous equations. (9 marks)

$$2x - 3y + 4z = -4$$

$$x + 5y - 2z = 15$$

$$4x + 2y + 6z = 10$$

12. (a) Explain four advantages of the interview method in data collection.

(8 marks)

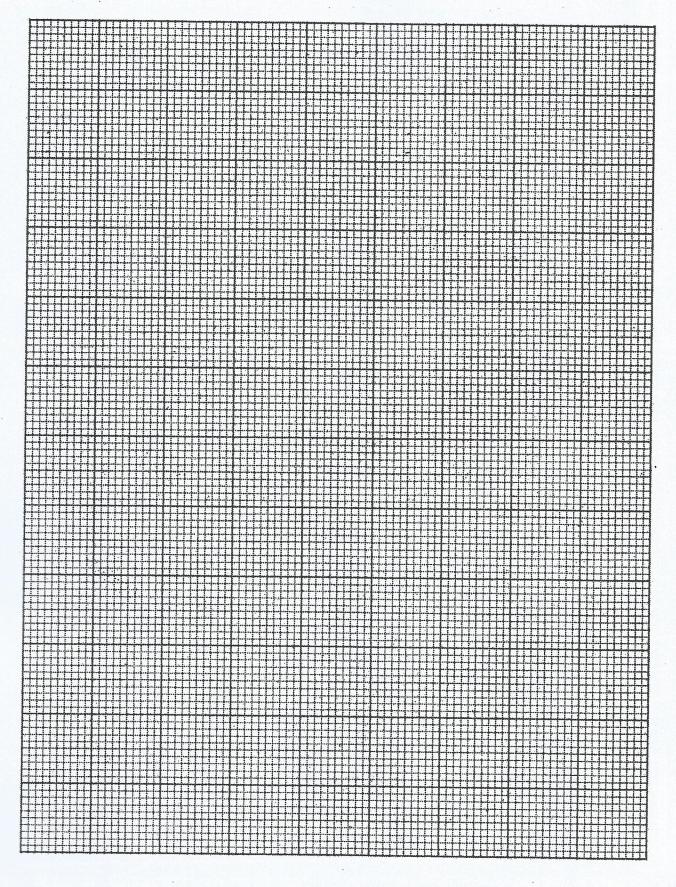

(b) The table below shows the distribution of monthly rent of 300 houses in an estate.

Number of houses
16
24
59
100
41
31
19
10

(i) Draw a histogram to present the data above;

(ii)	Using the histogram in (i) above, estimate the rent paid by the majority	of of
	the tenants.	(9 marks)

	•			
			•	

13.	(a)	Explain four lin	nitations of index numbers.	(8 marks
	(b)	The distribution table below:	of weights (kg) of 100 students in a college	
		Weight (kg)	Number of students	
		50.5 - 52.5	2	
		52.5 - 54.5	12	
	-	54.5 - 56.5	22	
		54.5 - 58.5	30	
		58.5 - 60.5	20	
		60.5 - 62.5	10	
		62.5 - 64.5	4	
		Calculate the co	efficient of variation.	(9 marks)
